

EmbRaceR: Finding Basic Associations

Dejan Sarka

Instructor Bio

- Dejan Sarka
 - ~35 years of experience
 - Data Platform MVP, MCT
 - 18 books
 - 20+ courses
 - Focus:
 - Data science
 - Data quality
 - Data modeling

Course Introduction

- After data overview and preparation, the analytical part begins with intermediate statistics in order to analyze associations between pairs of variables. The fourth course in the EmbRaceR series introduces methods for researching linear dependencies.

Modules

- Associations between pairs of variables
- Multi-variate associations

End of module 00: Course Introduction
